Summary

Computer Engineering student with a solid foundation in software development, focused on building user-centric applications. I enjoy exploring modern technologies and continuously adapting my skills to industry trends. My main goal is to solve complex problems and create impactful web and game experiences.

Experience

Full Stack Web Developer Intern

Dokuz Çeyrek AŞ • İstanbul, Türkiye

06/2025 - 07/2025

- Built responsive, high-performance web applications utilizing **Next.js** and **Tailwind CSS** to ensure an optimal user experience across all devices.
- Designed and implemented secure backend architectures and scalable database schemas utilizing **Firebase** and **Supabase** for efficient data management and user authentication.
- Developed core platform features from scratch, including dynamic blog pages, interactive community forums, and comprehensive data listing pages.
- Built a custom administrative panel to streamline content management workflows and oversee platform operations effectively.
- Implemented **SEO optimization** strategies and best practices, improving the platform's organic search rankings and online visibility.
- Collaborated across the full software development lifecycle, focusing on writing clean, maintainable code and optimizing application performance.

Projects

Multi Game Arcade: A mobile application developed individually as part of the COMP205 (Mobile Programming) course, featuring small, byte-sized games such as Tetris and 2048. Built with Flutter, utilizing Firebase Authentication and Realtime Database to support multiplayer functionalities and secure user login.

Other Projects: Various web development, games, and beginner-level programming projects. Examples of my work can be reviewed on my GitHub profile.

Skills

Full Stack Web Development, Game Development with Unity, Object Oriented Programming, HTML, CSS, JavaScript, NextJS, Java, C, C#, Python, Flutter, Firebase, Supabase

Education

Computer Engineering (B.Sc.)

Abdullah Gül University • Kayseri, Türkiye
